NMDC Energy Secures Major \$2.64 Billion Contract for Lower Zakum Offshore Project

In a significant advancement for the UAE's offshore oil industry, NMDC Energy has been awarded a substantial \$2.64 billion contract for the development of the Lower Zakum offshore oil project. This prestigious contract, granted by ADNOC Offshore, emphasizes NMDC Energy's strong capabilities and leadership in executing major engineering, procurement, and construction (EPC) projects, further solidifying its reputation in the global energy market.

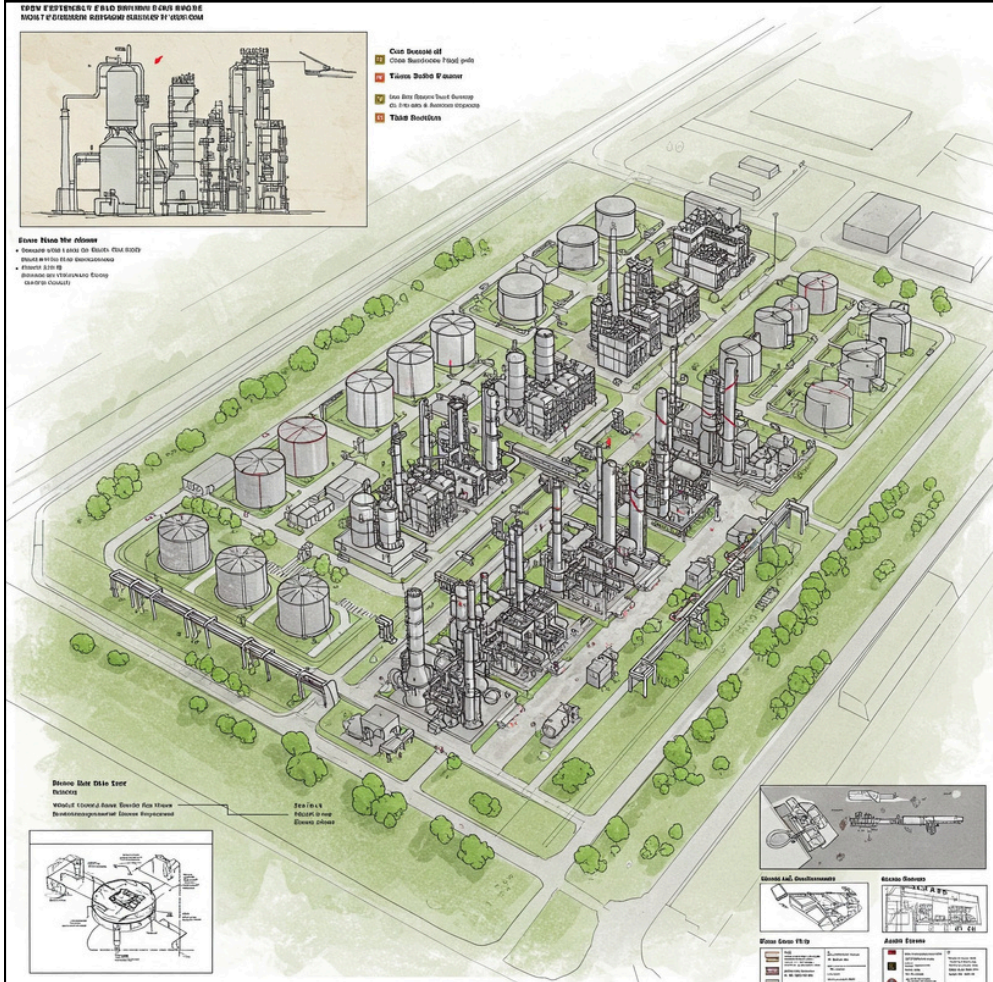

The Lower Zakum field, strategically situated offshore Abu Dhabi, is one of the region's most vital assets for oil production. The project will enhance the field's production capacity and operational efficiency, positioning NMDC Energy as a key contributor to Abu Dhabi's long-term energy objectives and economic growth.

Awarding this large-scale project to NMDC Energy is anticipated to deliver substantial economic benefits to the UAE, generating new employment opportunities and stimulating growth in related sectors. As NMDC Energy moves forward with this ambitious undertaking, the successful execution of the Lower Zakum offshore project will undoubtedly bolster the company's market presence and support broader national energy goals.

Aramco Initiates Tendering Process for SASREF Expansion in Q2 2025

Saudi Aramco is set to commence the tendering process for the expansion of its Saudi Aramco Jubail Refinery Company (SASREF) in the second quarter of 2025. This strategic initiative follows a recent Development Framework Agreement aimed at significantly enhancing SASREF's refining and petrochemical capabilities. The expansion reflects Aramco's ongoing commitment to advancing its downstream operations and meeting growing global demand for high-quality petrochemical products.

Saudi Aramco is set to commence the tendering process for the expansion of its Saudi Aramco Jubail Refinery Company (SASREF) in the second quarter of 2025. This strategic initiative follows a recent Development Framework Agreement aimed at significantly enhancing SASREF's refining and petrochemical capabilities. The expansion reflects Aramco's ongoing commitment to advancing its downstream operations and meeting growing global demand for high-quality petrochemical products.

The upcoming tendering process is anticipated to generate significant interest from both domestic and international contracting firms. The successful completion of this major expansion will enhance SASREF's operational capabilities, contribute substantially to regional economic growth, and reinforce Aramco's leadership role in driving Saudi Arabia's economic diversification and global energy prominence.

SATORP Awards Engineering Services Contract for Saudi Refinery Project

SATORP (Saudi Aramco Total Refining and Petrochemical Company), a joint venture between Saudi Aramco and TotalEnergies, has awarded a significant three-year contract to NextChem Tech, a subsidiary of MAIRE, to deliver specialized engineering and technology services for the Sulphur Recovery Complex at its refinery located in Jubail, Saudi Arabia.

Under the newly signed agreement, NextChem Tech will provide comprehensive process and engineering advisory services designed to optimize performance, support operational troubleshooting, and improve the energy efficiency and environmental footprint of critical units within the complex. This includes key facilities such as the Sulfur Recovery Unit, Amine Regeneration Unit, and the Sour Water Stripper. The contract further involves evaluating capital investment opportunities, implementing design improvements, and recommending technological enhancements.

This strategic partnership marks an important step toward sustainability and enhanced operational excellence in the refining sector. The collaboration between SATORP and NextChem Tech not only emphasizes their mutual commitment to technological innovation and environmental responsibility but also reinforces their shared goal of setting new standards for efficiency and sustainable practices in the industry.

बैंक ऑफ़ इंडिया **BOI** 
Bank of India
Head Office: Star House, Plot C-5, 'G' Block,
 Bandra-Kurla Complex, Bandra (E), Mumbai – 400 051.
Recruitment of 180 Officers in various scales
Project No. 2024-25/1
 Bank of India, a leading Public Sector Bank, invites online
 applications for Recruitment of 180 Officers in various scales
 upto Scale IV. Dates for Online Applications – 08.03.2025 to
 23.03.2025
 For further details, please visit “Career” Section on our website
www.bankofindia.co.in from 08.03.2025 onwards.
General Manager (HR)

 **IDBI BANK LIMITED**
Regd. Office: IDBI Tower, WTC Complex,
 Cuffe Parade, Mumbai 400 005, Tel: 022-6655 3355
Advertisement No. 13/ 2024-25
Appointment of Chief Economist, Head-Data Analytics & Dy. CTO (Channels)
 IDBI Bank Ltd. invites applications for the following posts on Contractual Basis.

Sr. No.	Post Name	Vacancy
1	Chief Economist	1
2	Head – Data Analytics	1
3	Dy. CTO (Channels)	1

 For eligibility criteria (age, work experience, job profile etc.) and
 other details, please visit the 'Careers' section of the Bank's website
www.idbibank.in

Applications received on or before 26.03.2025 will be considered.
NOTE: IDBI Bank reserves the right to accept or reject any/ all application(s)
 without assigning any reason(s) whatsoever. Any addendum/modifications with
 regards to the selection process shall only be published on the Bank's website
 (career section) www.idbibank.in and not through any other media. Candidates
 are requested to regularly visit the Bank website, for any update in the matter.
Place - Mumbai **General Manager-HRD**

 **OCEAN TECH SOLUTIONS**
 CHOICE OF SOLUTIONS

WE ARE HIRING

OPEN POSITIONS • Location: UAE

- Structural Draughtsman
 Min 2 yrs exp. Proficient in 2D AutoCAD
- Structural Engineer:
 Min 4 yrs of exp with StaadPro, SACS & Ansys
- Naval Architect:
 Min 2 yrs of Project Experience
- Project Engineer:
 Min 3 yrs of exp with Shipyard, Vessel repair
 modification

ENERGY JOBS

HIRING FOR LEADING ELECTRICAL CABLE MANUFACTURING CO. IN UAE & KSA

LARGE VACANCY

DIRECT COMPANY VISA

EXCELLENT SALARY PACKAGE

WALK-IN CLIENT INTERVIEW

Vapi : 26TH March 2025 Venue : Hotel Palm Regency, Near 21st Century Hospital, G.I.D.C, Gunjan Char Rasta, Gunjan Road, Vapi, Gujarat-396195. PT8479688

Vadodara : 27TH & 28TH March 2025 Venue : IFT Engineering PVT LTD, A25/117 Krishna Industrial Estate, Near Bidc Gorwa, Vadodara-390016. PT8479694

Mumbai : 29TH March 2025 Venue : Aisha Site Center, 10/12 Hussain Ali, Blg, Near Sagar Hotel, Duncan Road Nagpada, Mumbai-400008. PT8479676

- Production Section Head
- Production Engineer
- Planning Engineer
- QC Engineer
- QC Supervisor
- Production Supervisor
- Process Improvement Supervisor
- Planning Supervisor
- Supervisor - Ncrs Root Cause
- QC Inspector
- Inspector - In process
- Engineer - Technical
- Mechanic

JOB REQUIREMENTS

- Electrical cable manufacturing Industry experience is mandatory
- Duty Hours : 8 hours + OT (As per work) | Contract period 2 years

- BENEFITS - FOOD, ACCOMMODATION, TRANSPORTATION AND MEDICAL FACILITIES PROVIDED BY COMPANY

IF YOU WISH TO APPLY FOR THE DESIRED POSITION, YOU CAN APPLY AT BELOW EMAIL ID:

 fgheewalaa@gmail.com  **8828873111**

To know more information kindly visit website  <https://www.gheewalajobs.com/>

WE DO NOT HAVE ANY BRANCH OFFICE KINDLY SEND YOUR CV IN WORD FORMAT
(License No: B-0766/MUM/PART/1000+5/9138/2015) Govt of India (Ministry of External Affairs)

TECHINT
Engineering & Construction

WALK-IN INTERVIEWS

ELECTRICAL ENGINEER / DESIGNER

17th March' 25 To 21st March' 25

09:00 AM To 03:00 PM

Relevant Experience

- 06 to 12 years

Qualifications:

- **BE Electrical Engineer -**
(Software - ETAP, Dialux)
- **Electrical Designer -**
(Contract/Permanent)
I.T.I./Diploma
(Software - AutoCAD,
E3D/SP3D)

Simply walk into our office with updated copy of your resume.

Damage Mechanism in Oil gas industries not covered in API 571:

Pipeline External Stress Corrosion Cracking:

Oil and gas buried pipelines are externally protected by a combination of coatings/wrappings and cathodic protection. When the coating or wrapping fails, water can accumulate between the coating/wrapping and the pipeline steel surface. The composition of such accumulated water can result in external stress corrosion cracking.

An oil transportation pipeline observed with oil leaking. Visual inspections revealed macrocracks and shallow pits on the external surface of the corroded area (Figure 1). Optical observation indicated that cracks were started from the bottom of the pits and extended into the wall thickness as shown in Figure 2. There was a main singular crack and some branched cracks at the end. The crack features are characteristics of a stress corrosion cracking.

Figure 1: Macroscopic Observation of the cracking Area:

Figure 2: (a) Initiating of cracks from pitting on the surface of the carbon steel pipe and its branched development (unetched), (b) intergranular crack growth in the microstructure (etched)

Description of Damage Mechanisms:

The external pipeline corrosion damage mechanism is due to

1. High pH SCC
2. Near neutral pH SCC.

High-pH SCC: In high-pH SCC case, the external cracks more often initiate and progress intergranular. Fig 2 (b). A concentrated carbonate-bicarbonate ($\text{CO}_3\text{-HCO}_3$) solution has been identified as the most probable environment responsible for high pH SCC. Such an environment can develop as a result of the interaction between the hydroxyl ions produced by the cathode reaction and carbon dioxide (CO_2) in the soil. The pH of this electrolyte depends on the relative concentration of carbonate and bicarbonate, and the cracking range is between pH 8 and 11. The presence of multiple black thumbnail-like flaws on the fracture surface normally is an indicator that SCC caused the failure. Analysis of liquid trapped in the dis-bonded area or in the crack itself from several pipeline failures revealed a carbonate-bicarbonate solution with a pH of 8 to 11.

The reason for the cracks remaining at the grain boundaries is related to the chemical heterogeneity at the grain boundaries. The grain boundaries are preferentially attacked or etched by exposure to the carbonate-bicarbonate solution at potentials in the intergranular cracking range.

Near-neutral pH SCC: In low-pH SCC, cracks extend trans granular. Fig 2(a)

In the case of near-neutral pH SCC, the exact mechanism is not clear. The fact that the cracks contain corrosion products suggests that dissolution occurs within the cracks, but this does not appear adequate to account for the observed crack growth rates. Hydrogen evolution occurs during SCC of pipeline steels in dilute aqueous solutions. The evolved hydrogen diffuses into the steel around the crack tip. Lower pH and lower electrochemical potentials facilitate evolution and enrichment of hydrogen. These increase the SCC growth rate.

In near-neutral pH solutions, hydrogen enhances anodic dissolution at or near the free corrosion potential. However, at lower pH values or below a certain applied cathodic potential, the cracking process is dominated by hydrogen-assisted cracking.

Affected Materials:

All ferritic pipeline steels are susceptible to external high-pH and near-neutral pH stress corrosion cracking (SCC)

Affected Units of Equipment

All buried pipelines with an external coating/wrapping under cathodic protection are susceptible.

Appearance or Morphology of Damage

High-pH SCC

Cracking is primarily intergranular (between the steel grains), forming narrow, tight cracks with almost no evidence of secondary corrosion of the crack wall. Coalescence of cracks is essential for crack growth.

Near-Neutral pH SCC

Near-neutral pH SCC is primarily transgranular (across the steel grains), developing wide cracks with evidence of substantial corrosion of crack side wall. Cracking is not continuous and is found in locations where environmental conditions change.

Prevention/Mitigation

- Use a coating system that is resistant to disbondment and has the ability to pass cathodic protection (CP) current such as fusion-bonded epoxy (FBE).
- Utilizing a high level of negative potential in cathodic protection provides condition for production of carbonate and bicarbonate which induced SCC. Therefore, controlling of the potential can be effective in reduction of these failures.

Inspection and Monitoring

Pipeline external SCC can be detected through the following:

Inline Inspection (ILI): ILI continues to improve as new methods of detecting and sizing SCC have been developed. Ultrasonic Shear Wave Ultrasonic Crack Detection (UTCD) and Electro Magnetic Acoustic Transducers (EMAT) are the proven ILI technologies for SCC sizing and detection. UTCD tool is the preferred technology for SCC inspection of liquid pipelines while EMAT is the preferred method for Gas and NGL pipelines.

About the author

MR. NARENDRAN VENKATRAMAN

Senior Inspection Engineer

Over 18 years of experience in the inspection, troubleshooting, and fitness-for-service evaluation of pressure equipment and fired heaters. His expertise spans refinery, petrochemical, and power plants, specializing in static equipment integrity with Saudi Aramco and Reliance Industries Limited.

Narendran is an IBR-authorized competent person and holds multiple industry recognized certifications including Certified RBI Professional (API 580), API certified Pressure Vessel, Piping and storage Tank Inspector.

LEVERAGING GAMMA APP FOR ENHANCED PRESENTATIONS IN THE OIL AND GAS INDUSTRY

The oil and gas sector frequently demands compelling presentations that effectively communicate complex technical data and strategic insights. GAMMA, an innovative AI-driven platform, is specifically designed to transform the way professionals create and deliver impactful presentations. Its intuitive, AI-powered tools help industry professionals swiftly convert large data sets, complex research, and technical documents into clear, engaging narratives and visually appealing slides.

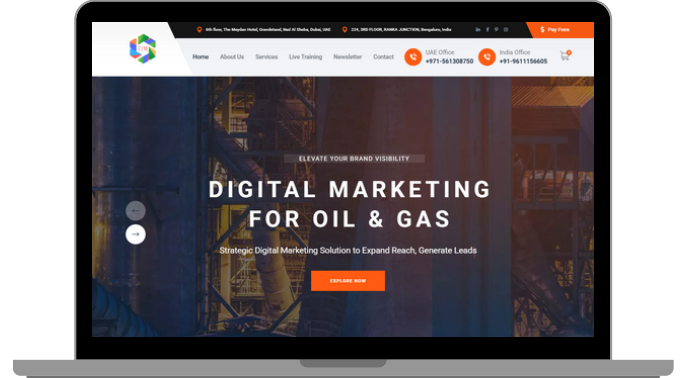

GAMMA streamlines the creation process by automatically generating structured presentations from raw text or documents, significantly reducing the time and effort required for preparation. For oil and gas professionals, GAMMA facilitates the clear visualization of intricate processes such as reservoir modeling, risk assessments, operational workflows, and real-time monitoring data. This functionality enhances collaboration, understanding, and strategic decision-making, providing valuable support in meetings, project reviews, and stakeholder engagements.

Utilizing GAMMA empowers oil and gas teams to present confidently and effectively, highlighting critical information and insights. By simplifying complex data presentations, GAMMA ensures clarity and fosters improved strategic discussions. Ultimately, adopting GAMMA equips organizations to enhance communication efficiency, optimize decision-making, and maintain competitiveness in the dynamic energy landscape.

Excellence Integrity Management (EIM) Now Offering Digital Marketing Services for Oil & Gas Vendor Companies

As the oil & gas industry evolves, businesses are increasingly leveraging digital marketing to enhance their brand presence, attract clients, and stay competitive in a rapidly changing market. Excellence Integrity Management (EIM) is now offering specialized digital marketing services tailored for Oil & Gas Vendor Companies, helping them expand their reach, generate high-quality leads, and establish a strong online presence.

Why Digital Marketing is Essential for Oil & Gas Vendors

Why Digital Marketing is Essential for Oil & Gas Vendors

Traditionally, oil & gas vendor companies relied on trade shows, networking events, and referrals to secure business opportunities. However, in today's digital-first landscape, companies need a strong online presence to effectively engage with industry stakeholders, showcase expertise, and stay ahead of the competition.

How EIM Helps Oil & Gas Vendors Dominate the Digital Space

With deep industry knowledge and expertise in digital marketing, EIM offers a unique advantage for oil & gas vendors looking to stand out in the competitive market.

With EIM's digital marketing solutions, vendors can

INCREASE BRAND VISIBILITY

Position their business as a key player in the industry.

ENHANCE INDUSTRY ENGAGEMENT

Build authority through thought leadership content.

GENERATE QUALIFIED LEADS

Reach the right audience with targeted campaigns.

BOOST CONVERSIONS & ROI

Transform online traffic into business growth.

SEARCH ENGINE OPTIMIZATION (SEO) FOR B2B GROWTH

LINKEDIN & SOCIAL MEDIA MARKETING

CONTENT MARKETING & THOUGHT LEADERSHIP

WEBSITE DEVELOPMENT & OPTIMIZATION

PAID ADVERTISING (GOOGLE ADS & LINKEDIN ADS)

VIDEO MARKETING & REELS FOR INDUSTRY ENGAGEMENT

How EIM Helps Oil & Gas Vendors Dominate the Digital Space

With deep industry knowledge and expertise in digital marketing, EIM offers a unique advantage for oil & gas vendors looking to stand out in the competitive market. Our data-driven approach ensures:

- ◆ Industry-Specific Marketing Strategies – Tailored solutions designed for B2B oil & gas businesses.
- ◆ Data-Driven Campaigns – Insights-driven marketing that delivers measurable results.
- ◆ Proven Success in the Oil & Gas Sector – Years of experience helping energy companies grow.

Take Your Business to the Next Level with EIM

Whether you're an equipment supplier, service provider, or technology vendor in the oil & gas industry, EIM's digital marketing expertise can help you drive business growth and industry recognition.

1 MONTH ONLINE TRAINING COURSE

Certified RCA Practitioner

**RLT Smart Asset
Proprietary Software of
Reliability Management**

What you can do with Software

1. Create your own Machine data
2. Carry out 5 Whys and RCA Analysis scenarios
3. Generate Reports

Meet Your Instructor: Samir Kumar Parmar

- 26+ years of experience in Oil Refinery, Gas Processing, and Petrochemicals.
- Worked with top companies like OQ8, PDO (SHELL JV), KNPC, Saudi Aramco JV, and Reliance Industries.
- Expert in reliability & asset integrity, specializing in RCFA, RCM, and maintenance planning.
- Skilled in advanced tools like GE APM, OSI PI, SAP PM/MM, MAXIMO, and FMEA.

Learning Objectives:

1. Learn RCA or 5 Whys Facilitation skill
2. Understanding Various Risk scenarios
3. How to develop Sequence of Events
4. Understand Causal Relationship
5. Practices 5 whys and RCA Analysis yourself

Starting from

5th April 2025

7:00 - 9:30 PM (UAE TIME)

Saturday/Sunday

LIVE

MS Teams

FEE - 350 USD

Excellence Integrity Management

UPCOMING TRAININGS

8 CPD hours Live Sessions with Certificate

07th April 2025

Welding Repair and Inspection Best Practices

- Learn how to identify welding defects and apply proper repair techniques.
- Explore Non-Destructive Testing (NDT) methods to ensure weld quality and safety.
- Understand best practices for welding critical components in high-risk environments.

14th April 2025

Pressure Vessel: Fabrication, Inspection, and Lifecycle Management

- Gain insights into pressure vessel design, materials, and fabrication standards.
- Learn Inspection techniques and regulatory compliance for safe operation.
- Discover maintenance strategies to extend the lifespan of pressure vessels.

21st April 2025

Integrity Operating Windows: Risk Mitigation Techniques

- Understand the concept of Integrity Operating Windows (IOWs) and their role in asset reliability.
- Learn how to set, monitor, and manage IOWs to prevent equipment failures.
- Explore case studies on how IOWs mitigate risks in the oil and gas industry.

28th April 2025

All About Damage Mechanism in Oil & Gas

- Identify different damage mechanisms affecting oil and gas equipment.
- Learn how to detect, assess, and prevent common failure modes.
- Understand API 571 guidelines and industry best practices for damage control.

Speak Like A Great Manager

© George Stern

“What do YOU think?”

Ask for employees' insights frequently

“Where do you want to be in 5 years?”

Invest in their career goals and success

“We'll get through this together”

Ensure they know you've got their back

“Your feedback was spot on”

Solicit feedback, act on it, and share that you did

“Here's why I made that decision”

Make the tough calls and then explain them

“What would make that easier?”

Look for ways to remove road blocks

“Take some time off - you've earned it”

Recognize and reward extra hard work

“I love that you took a risk. What did you learn?”

Normalize risk taking, learning, and growth

“Do you have enough direction to run with this?”

Set clear expectations and ensure they've landed

“Will you lead that for us?”

Delegate and empower employees to step up, showing you trust them

“I won't be on email while I'm gone”

Role model balance - in talk and action

“How was your kid's soccer game?”

Care about employees' lives outside work

“How can I better support you?”

Ask for feedback on your leadership

“You all rocked it”

Praise the team often and leave yourself out of it

“Next time, try...”

Give real feedback, but make it forward-looking and actionable

“You doing okay?”

Be kind: Recognize when things are off and listen

“I'll be quiet now”

Talk less and listen more

“Thank you”

Show gratitude often

“I messed up”

Role model ownership

LOOKING TO REACH A HIGHLY ENGAGED AUDIENCE

Advertise your brand through our monthly newsletter!

Why Choose Us?

- Access to professionals and decision-makers across the industry.
- Showcase your products or services to a targeted audience.
- Build visibility and trust with industry.
